Due to the construction & design of this part, it must be bolted to a plate to prevent distortion during U-Joint installation. The friction fit of the cups requires enough force during installation to warp the flange if it is not bolted to a plate during the pressing operation. These parts are lined bored to assure proper alignment.

**BODY MOUNTS & RELATED » Polyurethane Body Mounts**

Will replace distorted and worn-out original rubber mounts to maintain car body and truck cab to bed alignment. Original rubber mounts are so soft they often crack, distort, and crush so badly they often fall off! And aluminum body mounts are too harsh for street use that they tend to break and cause other components to break. Energy's specially formulated Hyper-Flex(TM) polyurethane cab and body mounts combine the best qualities of both: they're soft enough for a smooth ride, yet rugged enough for the most demanding road or track. Most sets have a strong zinc plated steel ring molded into them - for added durability and when the application requires it.

Features:

- Replace To Restore Ride Height
- Gain Durability
- Stronger Than Original Rubber Mounts
- GM BODY MOUNT SET W/HARDWARE

**1000080** Energy Suspension 1973-1982 Chevrolet Corvette Black Body Mount Set 3.4126G ..... **117.99**

Unlike stock rubber mounts which gradually compact, these polyurethane body mounts are a once-in-a-lifetime replacement. One set does the entire car.

- All components are individually packaged and identified and include easy to follow instructions.

Keep your restoration project running smooth with this high quality spring, made to fit your 1978-1982 Corvette.

There are many reasons to replace the rear leaf spring on your C2 or C3 Corvette, which by now may have broken leaves or is simply fatigued. The most obvious symptoms of a rear leaf spring needing replacement are the ride height is too low and the car's handling is poor. Beyond symptoms, a weakened rear leaf spring harms the drivetrain by forcing the parts to run at an incorrect angle. This puts the U-joints in a tighter bind position, pushes the differential yokes into the pinion shaft, often requiring their replacement and places unnecessary wear on the differential clutch pack and the ring & pinion. Replacing the rear leaf spring will restore lost ride height and correct the myriad of problems associated with sagging, worn-out springs. This 9-leaf rear spring meets or exceeds factory specifications. It is heat-treated, as was the original, painted with black enamel and has rubber/vinyl liners to assure smooth, quiet operation.

Adjustable rear strut rods allow for more camber adjustment and better freedom of motion. The rod ends eliminate binding in the suspension that creates unpredictable handling. Blocking plates keep the alignment adjustment from creeping over time. PTFE lined rod ends make for a durable joint and high strength, light weight aluminum improves overall vehicle performance by reducing mass.

The benefit of our split style strut rod bushings is self-centering installation. Rubber bushings frequently are installed off-center, thereby causing alignment and installation problems. Split style bushings can also be installed at home with a large vise. The bushings are made of polyurethane with a steel sleeve to improve ride and rear camber control.

A classic symptom of a bad wheel bearing in your C2 or C3 Corvette is noise. If a wheel is making "funny" noises when driving (squeaks, chirps, squeals, moans, etc.), or you hear a grinding noise when turning, it may indicate a bad wheel bearing. Other symptoms include steering wander or possibly a pull to one side when braking. This premium quality kit includes everything you need to replace your rear wheel bearings. Premium Quality Replacement Wheel Bearing & Seal Kit includes:

- 1 Inner Bearing And Race
- 1 Inner Seal
- 1 Outer Bearing And Race

No more weeping seals due to long periods in storage, but when in action, the o-ring provides a tight seal for maximum pressure and sure stops. Kit includes specially designed pistons, piston o-ring seals, outer boot seals and caliper half passage seals. NOTE: Each kit converts 1 caliper. Should be used with stainless sleeved calipers. - Thicker Than OE Copper Circuit Paths for Secure Circuit Contact
- Direct Replacement

A new 1977-1982 Gauge Cluster Printed Circuit Board could provide the solution to your blinking or non-functioning gauges and gauge lamps. This discontinued GM circuit board has been re-made with thicker copper circuit paths and bulb contact points at an investment you can afford! Don't be fooled by cheap imitations that are thinner and will not function correctly.

*There are many sounds and sensations Corvette fans look forward to experience when enjoying their favourite sports car. The rattling of a door window is definitely a sound an owner would want to eliminate as it may also result in scratches to the window's glass if not addressed. This condition is often a result of a worn anti-rattle door window bumper pad in need of replacement. This set of anti-rattle door window bumpers from Redline Restomotive® is suited to reduce the annoying rattling on 1969-1996 Chevrolet Corvettes.*

- For installation on 1969-1996 Chevrolet Corvettes
- Replacement for factory original equipment
- Prevents window rattling and scratching

*FINALLY!! An insert to fill in the blank, "black holes" in your side fender. All other years of C3's had some type of insert or grille, except the 73-79's. Transform your 73-79 Corvette with that great classic look shared by earlier and later Corvettes by dressing-up the front fender vents. Our matt black grilles are computerized Waterjet precision cut and each kit comes with everything you need for easy installation. Unlike, other aftermarket grilles, our patent pending all weather attachment process does not require any permanent modification to your body or use tape that can easily fall off. No Holes to Drill in the paint! If you want to dress up those black holes in your C3 fender vents and give your car that look that it should have had from the factory, you will love these high quality anodized aluminum matt black grilles. Take a look at the pictures of this item as they say it all.*

The Headlight Door Actuator mounts directly to the housing support. The Clevis Link Pin threads onto the shaft that slides in through the support hole. **NOTE:** For 1981-1982 Corvette Owners: The position of the Left and Right Actuators were reversed for 1982 and possibly 1981 Corvettes built in Bowling Green plant. The curved tube on the back of the actuators points outboard on 1968-1981 Corvettes and points inboard on 1982 Corvettes. Therefore, for 1982 models you need to order Left unit for Right side and Right unit for left side.

(xviii) Return Policy. Items must be returned in the original packaging within 30 days of invoice date for a refund of product cost to the original terms on the invoice. Items returned within 30 days not in the original packaging are subject to a 30% restocking fee. Items returned after 30 days not in a condition to be resold will be repaired and returned at the customer's expense. If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. Please be advised that once an order is submitted to Corvette Depot, there is no guaranteed possibility of cancellation. If you have attempted to cancel your order with us, and your cancellation has been denied, the item or items that you have ordered may not be eligible for cancellation. Items that may not qualify for cancellation can include: An order that has already shipped, an order that is in the process of being fulfilled by the warehouse, the items you are cancelling are custom made (ie. Painted Products, Floor Mats, Carpet, Interior Softgoods such as Seat Covers / Door Panels), the item is drop shipping from the manufacturer, the item is a gift certificate / digital gift card, or your order is being processed for a return.

If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, Corvette Depot reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted

from the resultant refund or credit.

(xx) Verify Members' Address: Corvette Depot reserves the right to contact a Member via email to verify the accuracy of account information (including the Member's correct name and address) that is needed to provide the Member with the information he or she requested from Corvette Depot.

(xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, Corvette Depot cannot provide a refund for any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. Corvette Depot reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: Corvette Depot does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
